### **Current Research, Technology and Education Topics in**

The ECA has been organising the European Microbiology Conference for 11 years. Due to the positive feedback from attendees, speakers and exhibitors, it has become an annual event in spring, presenting the current topics and developments in pharmaceutical microbiology.

### **European Microbiology Conference**

The atmosphere of the early Earth is hypothesized to have been rich in reducing gases such as hydrogen (H<sub>2</sub>). H<sub>2</sub> has been proposed as the first electron donor leading to ATP synthesis due to its ubiquity throughout the biosphere as well as its ability to easily diffuse through microbial cells and its low activation energy requirement.

Active efflux is a mechanism responsible for moving compounds, like neurotransmitters, toxic substances, and antibiotics, out of cells; a process considered to be a vital part of xenobiotic metabolism. This mechanism is important in medicine as it can contribute to bacterial antibiotic resistance. Efflux systems function via an energy-dependent mechanism (active transport) to pump out unwanted ...
