The plotter is a computer printer for printing vector graphics. Plotters draw pictures on paper using a pen. In the past, plotters were used in applications such as computer-aided design, as they were able to produce line drawings much faster and of a higher quality than contemporary conventional printers, and small desktop plotters were often used for business graphics.

Deforestation, clearance, or clearing is the removal of a forest or stand of trees from land which is then converted to a non-forest use. Deforestation can involve conversion of forest land to farms, ranches, or urban use. The most concentrated deforestation occurs in tropical rainforests. About 31% of Earth's land surface is covered by forests.

Deforestation - Wikipedia

So what does this mean for you if you're coaching young kids in today's competitive sports arena? It means that 98% of the time you will have to hold tryouts and then, at their conclusion, you will need to "cut" the excess players, the ones who, in your expert opinion don't measure up.
