

DATA INTEGRATION IN THE LIFE SCIENCES 4TH INTERNATIONAL WORKSHOP DILS 2007
PHILADELPHIA PA USA JUNE 27 29 2007 PROCEEDINGS

data integration in the pdf

Data integration involves combining data residing in different sources and providing users with a unified view of them. This process becomes significant in a variety of situations, which include both commercial (such as when two similar companies need to merge their databases) and scientific (combining research results from different bioinformatics repositories, for example) domains.
