Sustainability is the process of maintaining change in a balanced environment, in which the exploitation of resources, the direction of investments, the orientation of technological development and institutional change are all in harmony and enhance both current and future potential to meet human needs and aspirations. For many in the field, sustainability is defined through the following ...

Strategically Sustainable GSA: Strategically Sustainable. Sustainability means strong finances, a clean environment, and healthy employees and communities. At GSA, sustainability is helping federal agencies meet their missions today, without sacrificing their ability to serve future generations.

Sustainability | GSA

The paper explores the evolution of Design for Sustainability (DfS). Following a quasi-chronological pattern, our exploration provides an overview of the DfS field, categorising the design approaches developed in the past decades under four innovation levels: Product, Product-Service System, Spatio-Social and Socio-Technical System.
