The AMA has revised its Code of Ethics for doctors for the first time since 2006, to address close personal relationships, and working with colleagues, including bullying and harassment.

## **New Code of Ethics for doctors | Australian Medical**

Medical ethics is a system of moral principles that apply values to the practice of clinical medicine and in scientific research. Medical ethics is based on a set of values that professionals can refer to in the case of any confusion or conflict. These values include the respect for autonomy, non-maleficence, beneficence, and justice. Such tenets may allow doctors, care providers, and families ...
