### **dont get gubbed how pdf**

there should be an allen headed screw on the end of them . someone said you should realy take them of to check them right but careful someone at our work took one of that was still under pressure anywho if you hold it with the allen head at the bottom and carefully unscrew it , if gas comes out tighten straight away as you dont want to loose to much , if oil comes out its gubbed

### **Cost of soft ride for loader - British Farming Forum**

This didnt work, I tried it to the “t” on directions, I had the 5 caps lock thing flashing, and yes this was a last resort, but now i cant even get those lights, and it just runs the fan and blinks the screen, Im thinking that it was too hot at 385 for 8 mins, should have stopped at 6 i think and it would have maybe worked, I think 2 mins too long did it in.
