Gameplay. Beyond Earth is a turn-based strategy game played on a hexagonal-based grid, iterating the ideas and building upon the engine of its predecessor, Civilization V. Co-lead designer David McDonough described the relationship between the two games by saying "The bones of the experience are very much recognisably Civ.

Abstract. We explore the risk that self-reinforcing feedbacks could push the Earth System toward a planetary threshold that, if crossed, could prevent stabilization of the climate at intermediate temperature rises and cause continued warming on a "Hothouse Earth" pathway even as human emissions are reduced.
