electromagnetic compatibility principles and pdf

The Electromagnetic Compatibility Regulations 2006 apply to electrical and electronic equipment liable to cause or be affected by electromagnetic disturbance. These rules implement the EU ...

Manufactured goods and electromagnetic compatibility - GOV.UK

An electromagnetic pulse (EMP), also sometimes called a transient electromagnetic disturbance, is a short burst of electromagnetic energy. Such a pulse's origination may be a natural occurrence or man-made and can occur as a radiated, electric, or magnetic field or a conducted electric current, depending on the source.. EMP interference is generally disruptive or damaging to electronic ...

Electromagnetic pulse - Wikipedia

A nuclear electromagnetic pulse (commonly abbreviated as nuclear EMP, or NEMP) is a burst of electromagnetic radiation created by a nuclear explosion.The resulting rapidly varying electric and magnetic fields may couple with electrical and electronic systems to produce damaging current and voltage surges.The specific characteristics of a particular nuclear EMP event vary according to a number ...
