

ELEMENTS OF URBAN STORMWATER DESIGN

### **elements of urban stormwater pdf**

In addition to the pollutants carried in stormwater runoff, urban runoff is being recognized as a cause of pollution in its own right. In natural catchments surface runoff entering waterways is a relatively rare event, occurring only a few times each year and generally after larger storm events. Before development occurred most rainfall soaked into the ground and contributed to groundwater ...

Bioswales are landscape elements designed to concentrate or remove debris and pollution out of surface runoff water. They consist of a swaled drainage course with gently sloped sides (less than 6%) and filled with vegetation, compost and/or riprap.: 19 The water's flow path, along with the wide and shallow ditch, is designed to maximize the time water spends in the swale, which aids the ...
